**iPhone vs. Android**

## Which One is Best?

From the results, Apple won by far. We interviewed someone who has an Android and someone who has an iPhone to try to understand the results. When Pierson Clinger (6), was asked what he likes about his Android phone, he said, "Not much. They are really slow. However, the camera on my phone can zoom out. But it has bad quality. If I could get an iPhone I would because they are better." Then we asked an Apple user and her response was the complete opposite. Karly Scimienti (6), said, "Well, iPhones are less confusing and easier to use. Also, Apple phones are less bulky. It's just easier to use and has better quality." Overall, it appears that CMS students prefer iPhone over Android.

## Tik Tok Trends

Do you like TikTok? Then this section is for you! TikTok is an app where you can dance to songs, post funny videos, and watch so many other entertaining things. If you have TikTok, then you have probably spent a lot of time learning dances. Students can be observed doing the 'Clock Dance,' the 'Jump Style,' dance by 'Cradles,' and 'Renegade'. TikTok is the app for everyone.

"My favorite social media platform is Snapchat because I like to annoy my friends by blowing up their phones."

- Holdyn Melton (8)

"I would have to say Snapchat because you can express yourself with the pictures and you can also text and call people."

- Kennedy Crenshaw (6)

"Probably Snapchat because I get to talk to my friends and have streaks."

- Michael Smith (8)

What is your favorite social media platform and why?
