lubbock Texas

Average Salary of a Computer Programmer

66,499$ a year to 125,000$ a year.

Companies

HP – location, Plano Texas

Google – location, Austin Texas

Apple – location, Cupertino California

Microsoft – Dallas Texas

Typical Duties of a Computer Programmer

Some typical duties of a computer programmer are

1. Building software

2. Programming apps, websites, and games

3. Fixing computers with viruses

Some skills needed of a programmer are being able to program in different programs on a computer, understanding how to code, and knowing lots about computers, like how they work.

Outlook

A computer programmer has a bright outlook and future, but sadly is not a green job.

Pros and Cons

- Pros

1. I like to program

2. It is a growing job that has many openings

3. This job has a bright outlook

- Cons

1. It is not a green job

2. The pay is not super high, but it is ok

3. You sit in front of a computer all day

REASONS

I chose this job because I like programming, and I learned how to when I was 7. It is a very good choice for me also because I know a lot about computers
