

# THE BOTTLE POUCH!!

By : Dany Salvetti, Daniel White, and Brendan Case

# THE BOTTLE POUCH

What is it? The Bottle Pouch is a recycled plastic bottle, and we put modifications and WHAZAM! The Bottle Pouch was born. What does it do? We have invented it to hold your belongings and keep them dry. It can hold money all the way to your favorite collection items.

## Why Would You Buy it?

Why would we need this? Well here you go. have you ever wanted something to hold all of your belongings, but the things at the store are just way too expensive? Well not anymore this a recycled object so it's easy to make. We made this because it is a fun and easy innovation to hold things.

# Challenges in Creation

Like every other thing that has been invented there had to be a little, ok maybe a lot of frustration. During this creation we faced some challenges. One was connecting the end of a bottle to the top of another bottle. We solved this by almost swing the end on!

# Things to Change

We believe that next time we could change a few things. One thing is that we didn't 100% plan everything out. Like how we would attach the end of a bottle to the other bottle.

But a good thing we did was find a unique way to solve those problems that were unexpected.
